Wavelength Agile Laser Inventors: Woodley and MacKinnon Serial No. 09/954,495 l of 34

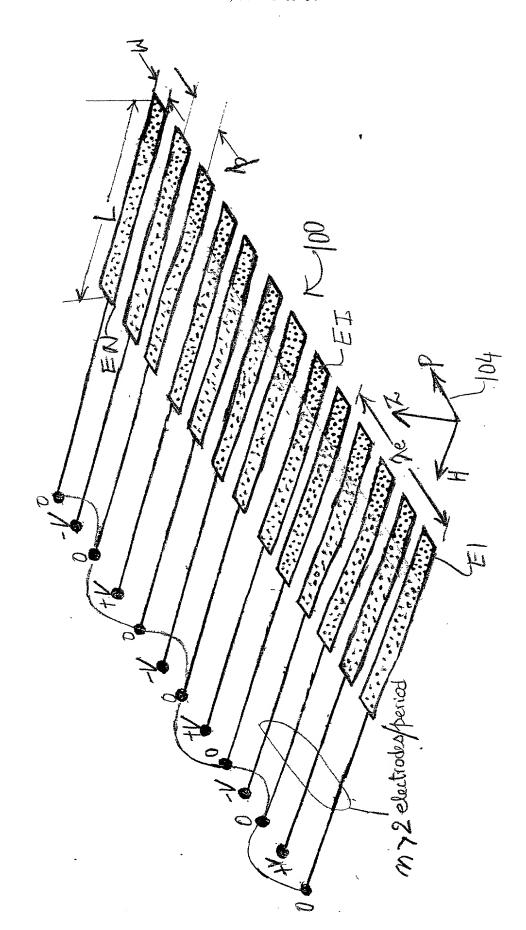

## FIG. 1B

determine, based on the mathematical model, a number of voltage levels V1-VN to be applied to corresponding electrodes E1-EN,

each voltage level VI to be applied at electrode EI may be different from voltage levels to be applied at successive but non-adjacent electrodes EI+2 and EI-2

apply voltage levels V1-VN to electrodes E1-EN, independently

Wavelength Agile Laser Inventors: Woodley and MacKinnon Serial No. 09/954,495 3 of 34

## FIG. 2B

select a mathematical model of a to-be-synthesized electric field

that is periodic in space, with more than two electrodes per period

determine, based on the mathematical model, a number of voltage levels V1-VN to be applied to corresponding electrodes E1-EN,

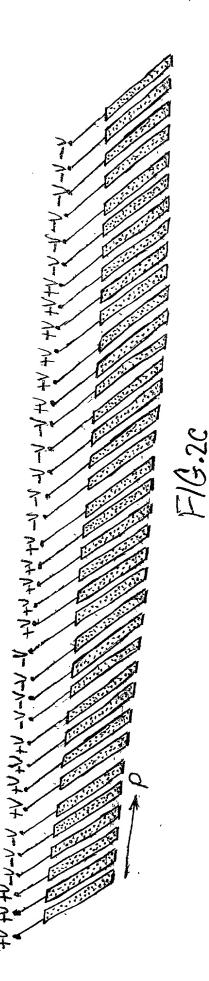

each voltage level VI to be applied at electrode EI may be different from voltage levels to be applied at successive but non-adjacent electrodes EI+2 and EI-2

apply voltage levels V1-VN to electrodes E1-EN, independently
